WIDESCREEN
constructon stage channel installation

The Widescreen system is packed with unique innovative features including front and back opening head boxes, in bracket blind level adjustment system, a floating base rail design and superior zip retention feeders with built in base rail stops compatable with Somfy Maestria motors

Other features include a new style blade seal available in 25 and 50mm, or the 10mm bubble seal for level installations. These are just a few of the Widescreens remarkable features.

Combining these features with the capability to span widths up to 6.5meters and drops of 3.4 meters the Widescreen is the ultimate zip guided external solution.

WIDESCREEN™

Cable Guided External Blind

Widescreen Cable Guided External Blinds are the base system of our range, simple strong and innovative. Slim and compact base fittings, multiple adjustments unique hold down features and simplified cable tensioning components. Manual or motorsied operation.

silentshade.com.au

Widescreen cable guided blinds also offer in bracket blind leveling but also an innovative cable tensioning system. Sleek low profile stainless steel fixings allow the base rails to rest a mere 10mm from the base fixing points, there are recessed base mount options as well as a height adjustable hold down system designed using advanced rigging technology borrowed from the yacht racing industry, simple, strong and easy to use.

The Widescreen extrusions are designed to perform, the strong structured base rail weighs in at 1.7kg per meter minimizing the need for extra ballast.

Widescreen is positioned to simplify production, installation as well as provide a well refined quality product to the end user.

WIDESCREEN™

Zip Guided Internal Blind

Widescreen Zip Guided Internal Blinds are very versatile, commonly used as a blackout solution in Hotels and residential properties. The wide spanning capabilities expand the possibilities for internal use. Combined with our exclusive Art Skin service the Widescreen offers designers endless creative opportunities for individual touch.

WIDESCREEN™

Internal Blind

Widescreen internal blinds Capable of wide spans and long drops making it the perfect solution for large openings reducing annoying light gaps.

Widescreen internal blinds incorporate the Silent Force noise reducing base rail, the rails architectural design features patent pending noise reducing components that eliminate harsh sounds associated with rails bumping against window frames.

The structural design and generous weight of the extrusion provides optimal performance on wide and narrow blinds., the weighty rail assists narrow blinds to roll true and provides superior fabric presentation on wide widths.

The Widescreen, It can be what ever you want it to be.
